

## Confidential Report

U6742441: Prateek Arora

Other Members: u6651968, Sambit Ghosh

I reviewed and applied all the classifiers and regressor algorithms whereas my team member has done data cleaning and pre-processing. I have divided the data of different sizes so that I can test my regressor and classifier and can identify which algorithm is best suitable for the getting less rmse values and high accuracy whereas my team member did the upsampling of the data. We have equally divided the work for coding as well as for the report. I am very satisfied by my teammate.
